

Vantage Pharmacies Selects SQLBase over SQL Server and InterBase

“By deploying SQLBase, Vantage reduced administrative time and support costs by 50%.”

Senior IT Manager
Vantage

ORGANIZATION PROFILE Vantage was founded in Argentina in 1992 based on the success of the pharmaceutical chain founded in the UK in 1975. Vantage offers a different, pleasant and modern atmosphere that not only dispatches medicine like traditional pharmacies.

Vantage, the leading pharmaceutical chain in Buenos Aires Argentina, embeds SQLBase in all of its chain stores.

PROBLEM Pharmacies that operate their business on a 24x7 basis require a reliable and DBA-less data store that has low hardware requirements and can support large volumes of transactions.

SOLUTION Vantage chose SQLBase to meet the requirements for its chain store applications.

BENEFITS

- Low support costs.
- Reduced administrative time.
- Robust database engine.

HIGHLIGHTS Deploying SQLBase allows for chain stores to function around the clock 24 hours a day, 7 days a week. SQLBase combines and consolidates all transactions of every branch office, allowing better service, data mining, and market research. The very complex insurance policies for drugs/prescriptions in Argentina are simplified using SQLBase, providing great value to all branch offices.

SQLBase offers Vantage the invisibility and robustness required for its day-to-day business activities such as sales management and analysis, inventory control and online validation transactions. Using SQLBase reduces administrative time and support costs for Vantage by 50%.
