

EASY TO USE, DYNAMIC REPORTING TRANSFORM YOUR DATA

Turn Data Into Business Intelligence

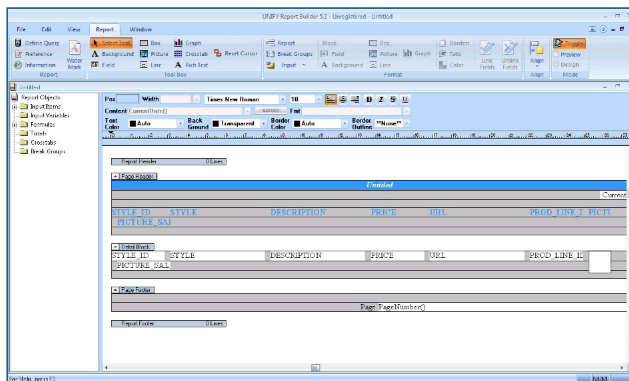

Report Builder is an easy to use, dynamic reporting tool that enables on-demand report creation to improve your business intelligence. Organizations are always searching for ways to transform data into valuable information to enable better decision-making. Report Builder affords organizations of any size the competitive advantage of working smarter and more effectively.

Within the walls of your organization, databases filled with valuable information exist, but likely require the tools to tap into that knowledge base. Imagine if, with a click of a button, you could request the data you want and view the information whenever you need it?

Work Smarter

Today, most organizations face the challenge of getting more done with fewer resources. Report Builder enables employees to acquire information efficiently while improving their overall decision-making processes through intelligent insight.

The new Grid in Report Builder includes powerful print and print preview features, all built into the object without the need for developers to care about printing details.

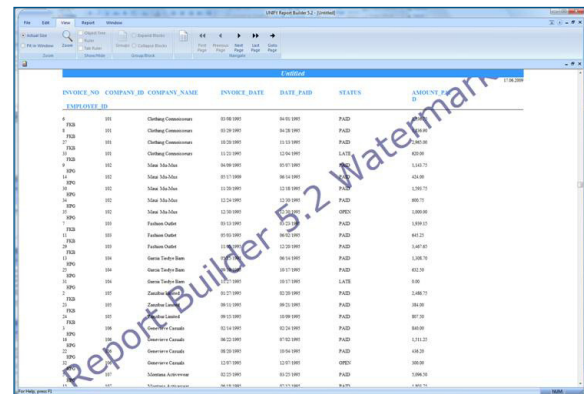

NEW IN REPORT BUILDER

- THEMED IDE FOR A SEAMLESS AND MODERN PRODUCT EXPERIENCE
- TEXT OR IMAGE WATERMARKS
- TEXT ROTATION
- SUPPORT OF THE LATEST DATABASE BRANDS AND VERSIONS

- Customized reporting
- Easy report sharing through PDF and RTF export
- Over one hundred built-in functions to manipulate data
- Standalone or corporate pricing available

REPORT BUILDER ENHANCEMENTS

New, Fully Themed Easy and Intuitive User Interface

Enjoy the fresh look and usability of the rearranged ribbon bar, now including application button.

Rich Text Objects

Print documents that contain bits of pre-created and preformatted rich text. The rich text can come from files created with for example Microsoft Word or they can come from a databases BLOB field.

Watermarks

Report Builder allows creating text and image watermarks. For image watermarks, the image scale can be defined. The washout option for images applies a transparency effect to the image. Text watermarks can be predefined acronyms or self defined text. Full formatting options for the text watermark are available.

Text Rotation

Text rotation in reports widens the creativity options for your reports by allowing text to be rotated in 90 degree steps.

Enhanced PDF Printing

Enhanced PDF printing options, allow influencing the quality and size of the pdf document by specifying the image quality and whether or not fonts shall be included into the document.

Support for Windows 7

Report Builder is made for the latest Windows operating systems including Windows 7, Windows Vista, and Windows Server 2008.
